DETAILED ACTION

Drawings

The drawings are objected to because the figure numbers are not shown. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang et al. (Pub.) in view of Xu et al. (Pub.).

In view of these claims, Chang et al. discloses a method of evaluating the performance of a hybrid analog-digital integrated circuit (Title) having an analog unit, a digital unit, and a substrate (Pg. 327 Col. 1 para. 1) on which the units are located, comprising:

identifying a broadband power source (Pg. 328 last para.) that represents noise characteristics of the digital unit (Pg. 328 1st para.) and *interfacing* of digital and analog on the integrated circuit which by testing evaluates

Art Unit: 2825

performance of a lumped digital circuit in which the source couples to a lumped element representing the substrate and the substrate couples to a lumped element representing the analog unit. Using a comparative method, Chang et al. fails to indicate that a simulation method was utilized. Yet, Xu et al. points out in a substrate noise reduction method that simulations of the integrated circuit are important (Pg. 482 2nd Col. lines 1-10). Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the invention to modify the comparative method of Chang et al. in favor of the Xu et al. simulation technique, with the intention of achieving better statistical results. Xu et al. found that more information was needed in the operation of the digital circuit and thru simulations; precise digital circuit noise operations could be defined well enough to be eliminated before arriving to the analog circuit (Pg. 482 2nd Col. 1st para.).

Allowable Subject Matter

Claims 2-4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9- 26 are allowable.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities – 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
